MEGAVAR® ELITE WHITE FINISHES

Mega Var® Elite White Conversion Varnish

MegaVar® Elite White is a premium, state of the art, pigmented conversion varnish. It is a very high solids coating that needs no reduction, resulting in a superb finish with less material applied. It is an excellent choice for any paint grade cabinetry, and in combination with MegaVar® Elite White Primer, is especially good for finishing MDF. Use with MegaVar® Elite 1MVP-1000 Primer/Undercoater for a complete finishing system.

- 1 MVW-1090 MEGAVAR ELITE WHITE CV-GLOSS
- 1 MVW-1060 MEGAVAR ELITE WHITE CV-SEMI-GLOSS
- 1 MVW-1030 MEGAVAR ELITE WHITE CV-SATIN
- 1 MVW-1020 MEGAVAR ELITE WHITE CV-DULL
- 1 MVW-1010 MEGAVAR ELITE WHITE CV-FLAT

MEGAVAR® ELITE WHITE PRIMER/UNDERCOATER

Lenmar® 1MVP-1000 MegaVar® Elite White Primer is a high solids catalyzed primer, and is the perfect choice for finishing all paint grade cabinetry, especially MDF. As an added benefit this product is also controlled as a tint base for off white colors, and is short filled to allow room for both colorant and catalyst.

MEGAVAR® ELITE NEUTRAL PRIMER/UNDERCOATER

Lenmar® 1MVNP-3000 MegaVar® Elite Neutral Primer is a neutral version of our white primer and is a controlled tint base designed for tinting medium to dark colors.

MEGAVAR® ELITE SEALER

Lenmar® 1MCS-0100 MegaVar® Elite Catalyzed Sealer is a post-catalyzed sealer offering excellent durability, sanding, and ease of use for the professional finisher. The high solids content helps protect the color of stained wood when sanding, and provides an excellent surface for subsequent coats.

MEGAVAR® ELITE PRODUCT SPECIFICATIONS CHART

Code	Product Description	Glosses Available	1MC-700 Catalyst (%/oz per container)	Solids (by weight)	VOC (g/l)	Recoat (minutes)	DFT mils max	Dry Color
